

2026 REPORT CARD

SOCIAL

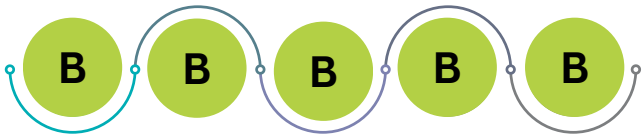
Gladstone Healthy Harbour Partnership

What is the Social component?

The social component of Gladstone Harbour focuses on how people connect with and value the harbour.

This includes how the community uses the harbour for recreation, cultural practices, education, and lifestyle—and how satisfied and engaged people feel with its health and management.

The 2027 Gladstone Harbour Report Card will report on Social health differently.



No new assessment was undertaken in 2026, and the results from the 2022 assessment have been used to calculate the Social Health results for the 2026 Report Card.

The overall grade for the Social Health was a Good (B), which was comparable to previous years.

Take a peek at the new Social indicator - coming in 2027.

HARBOUR USE

How do people use and enjoy the harbour and surrounding waterways?

PERCEPTIONS OF THE HARBOUR

How healthy do you believe the harbour's ecosystems and marine life are?
What environmental issues are you concerned about?
What do you view as long-term threats to the harbour?

PERCEPTIONS OF MANAGEMENT

How confident are people in the management of the harbour and its resources?
